

IN THE SPECIFICATION

Applicant proposes the paragraph at the bottom of page 7 be amended as follows:

Referring to FIGS. 6 and 7, stock module 12 has a receiving cradle 14 that fits over buffer tube module 2. Two attachment rails 18 are disposed at the upper two edges of the cradle 14. Behind receiving cradle 14 is the butt 16 of the stock. Butt 16 may be modified in various configurations, depending on the needs of the user. In the adjustable embodiment shown in FIG. 4a ~~4a~~ 3, latching mechanism 20 interfaces with rail track 8 via a bicusped tooth 28 and cam anchor 32.
